

In 2015, Emmanuel College, in collaboration with the Buddhist Education Foundation of Canada, launched an Applied Buddhist Studies Initiative (ABSI). The ABSI will complement the MPS Buddhist Program at Emmanuel by offering additional educational programming in Buddhist chaplaincy, hosting events to advance interdisciplinary scholarship through workshops, conferences, and publications. We hope that the ABSI will provide an array of opportunities for engagement by the Buddhist community and other academic disciplines and for the students in the MPS program to be exposed to a richer understanding of contemporary issues related to all the traditions of Buddhism as well as other faiths, helping them make practical use of their education in their future careers.
